RASPBERRIES 8

SPECIALTY FILTER ROASTED COFFEE

ALL BREWS 5.5

These beans are picked for their unique characteristics and lightly roasted so the flavours of the beans are more pronounced. This is the preferred roast to suit the below brewing methods.

AEROPRESS

With rich and bold flavours, this method immerses the coffee during the whole brewing process dampening the acidic characteristics with a lower brew temperature.

DELTER COFFEE PRESS

This portable method separates the water and coffee until brewing, so the cup is clean, bright and aromatic.

V60 POUROVER

Clean, bright and aromatic, this brew method gives you a lot of control over extraction, allowing a very complex cup.

BATCH BREW

The batch brew is a semi-automatic, large scale brew method. It produces a smooth, rich and aromatic cup, perfect for starting out your filter coffee journey.

COLD DRIP

A brew method which uses time not heat to extract, giving your cup smooth, rich and bold characteristics.

BREWING EQUIPMENT AVAILABLE FOR PURCHASE

ALL DAY MENU
